INTRODUCTION

TrendGuru is the smartest trending tech-bot, the results are generated from real on-time chain data from (ETH/BSC) and one of the most popular socials for crypto which is twitter. This allows investors to keep track of what's hot in the market, what's trending on the charts.

While other trending sites or bots are based on payment and fake volume, our trending is based on algorithms. Trend is your best friend when it comes to trading. Whether it's finding the next Trend or Meta our software will give you the edge, We believe in providing value to the crypto community #SmartTrading

AUTHENTIC ON-CHAIN TRENDING DATA

Empower Your Trades with Real Insights - Say Goodbye to Fake Trends!

Dextool Trending - Their data is simply useless, as any project can create fake volume to beat their algorithm. There are plenty of freelancers who get paid for these trending services. Their data is more like an "Advertisement slideshow."

Eth TG Trending - Their data is even worse than Dextool Trending, as anyone can simply pay to be listed on their Trending Board. You don't even need to fake any volume here. What kind of trending is this? We would rather call it "Advertisement Trending."

This is why Trend Guru is here to change the game. Just like how Watcher Guru updates their community with news related to crypto, we will bring more value to our traders too by giving them real on-chain live trending data. This will allow every investor to truly know what's TRENDING. We won't stop here; we will continue upgrading and updating our software to make sure our community has access to the best trending tools on the market, whether it's on Twitter or Telegram.
